The General Data Protection Regulation (GDPR) describes how organizations must collect, handle, process, and store personal information. These rules apply regardless of whether data is stored electronically, on paper or other materials. To comply with the law, personal information must be collected and used fairly, stored safely and not disclosed unlawfully. GDPR is underpinned by eight important principles. These say that personal data must:

- Be processed fairly and lawfully.

- Be obtained only for specific, lawful purposes.
- Be adequate, relevant, and not excessive.
- Be accurate and keep up to date.
- Not to be held for any longer than is necessary.
- Processed in accordance with the rights of the data subjects.

- Not be transferred outside the UK, unless that country or territory also ensures an adequate level of protection.
